

*Welcome to American Home Care Services*

**American Home Care Services** was established in 2008 in Saint Petersburg, FL. Our company provides the coordination and payments for Home Health Care Services provided by licensed Home Health Care Agencies within the comfort of our member's home.

Home Health Care benefits are made available through member plans. Each member plan provides a set number of hours for our members to use toward Home Health Care Services. Member plans provide between 1,000 to 10,000 hours of care for pennies on the dollar. To be exact, our members pay as little as fifty cents an hour for what would cost on average \$30.00 to \$40.00 an hour, depending on the city and state of care.

Because we are not an insurance company, but rather a service provider made possible through member plans, our members do not have to worry about being denied benefits or have their application declined. Our member plans are guaranteed to be approved regardless of age, health, pre-existing conditions, or any other ongoing health issues. In other words, every applicant is approved!

For the convenience of our plan members, we provide 24/7 service. Additionally, our Services are available to individuals or groups in all 50 states as well as Canada

**Statistically 70% of all seniors over the age of 65 will experience the need for Home Health or Nursing care.**

Have you given any thought on what you would do in case of sickness or accident? Would you go to a nursing home or stay in the comfort of your own home while receiving care? How would you pay for your care? Would you have to liquidate savings or ask family or friends to help pay your bills?

Each year, about 3 million senior adults are treated in emergency rooms for a slip and fall injury. One out of every five falls causes an injury, such as broken bones or head injury. Many falls occur on the way to or from the bathroom - 67% of falls are caused by a slip or trip. Inherently, Senior Adults with hearing loss have three times the risk of an accidental fall.

American Home Care Services provides Professional "Pre-Arranged" Care Companion and Homemaker services in the comfort of your own home, where the environment is safe and familiar. Medical professionals often state recuperation at home from any illness, accident or other health conditions is much faster than if you were institutionalized. Home care also allows for friends and family to stop by and visit any time YOU choose not just during visiting hours!

AHCS provides personalized care in the privacy of your own home where you decide what and when you want to eat, sleep, bath, dress, or simply take a walk around the house. Additionally, you decide if you would prefer a licensed professional care provider, a friend or family member to care for you. AHCS is the only company in America that allows YOU, the member, to choose who provides care. Should you choose a licensed home health care agency, AHCS will make all the arrangements for your care and monitor the progress on an ongoing basis until your care plan is complete. We offer you peace of mind by knowing you have efficient professional care with dignity.

- **Paid Up Plans** (Own it) Our Home Health Care Member Plans are the only plans in AMERICA to offer a paid-up option. All other plans require ongoing membership cost/fees year after year, with no end in sight.

- **Each Elite plan can be customized** to fit our members' lifestyle and needs. Our members receive unmatched professional care by licensed home health care professionals for pennies on the dollar. Although the average cost for home health care is \$30 to \$40 an hour, our Elite members pay as little as fifty cents an hour for the same coverage, with the same agency! Simple to use: When care is needed, our members can simply call the customer care hotline 24 hours a day, 7 days a week, to access our care coordinator concierge service.

Our coordinators ease the stress and worries by taking the burden off our members' shoulders by coordinating care in the comfort of the member's home with properly vetted licensed home health care professionals.

While cost continue to go up around the country our Member Plans stay the same. We built in an inflation rider within the member plan to help fight off escalating prices in health care. Although it will cost AHCS more money in the future for your care, your member plan premium does NOT increase! Once you fill out the application and become a member, your price is locked in and will not increase for life!

For people with Long Term Care Insurance, there is a good chance that you purchased it several years ago. More than likely, you purchased a plan that pays \$100.00 to \$150.00 per day for a period of three years. Generally, the dollar amount purchased was for nursing home care only, but for those individuals who purchased the home health care rider, it was typical to receive only half the dollar amount purchased for home health care services.

According to a Nationally recognized long-term care study, the cost survey reveals the following figures  
**Monthly Median Costs: National (2020)**

- **Nursing home (private room) \$8,121 a month.**
- **Nursing Home (semi-private room)\$7,148 a month.**
- **In-Home Care Homemaker Services \$4,481**
- **Home Health Care Aide \$4,576**

- Various factors impact how much a nursing home stay costs including location, size, length of stay and services offered. If your policy pays \$100 per day or \$3,000 per month where does the other money come from? Would you drain your savings or cause a financial burden on your financial future? Would you need financial assistance from family or friends? What if you did not have an insurance plan in place. How much of a burden would the cost of care be to you and your family?

- **Does Medicare pay for home health care?** Unfortunately, Medicare provides a limited number of hours and days of home health care. To qualify, care must be prescribed through your primary doctor. Medicare provides skilled care ONLY and must be medically necessary! Skilled care does not provide what people need when it comes to daily living activities, such as meal preparation, grocery shopping, assistance with hygiene, dressing, grooming, 24-hour care, transferring from room to room or travel to the doctor's office, medication reminders and assistance, health monitoring, toileting, help in and out of bed and many more services that assist with the requirements of everyday living.

**The number one reason for bankruptcy in America is due to unexpected medical bills!**

**American Home Care Service Member Plans** are a wonderful way to fill the gap, so your savings or independence is not in danger.

- We are located throughout the USA and Canada, with thousands of Home Health Care Agencies available to us and our members regardless of where you live. We're proud to say in all the 10 years we've been in business, we have never had a single complaint and enjoy a triple A rating with the Better Business Bureau, with many testimonial letters of satisfaction and appreciation.

**Desirable features of the American Home Care Service Member Plan.**

American Home Care Service member plans have always provided the comfort and confidence of knowing home care was only a phone call away, but now, through an affiliation with Amaze Health, our member plans have been elevated to a new level. Now, members have an MD at their fingertips 24 hours a day 7 days a week. Think of it as your own personalized medical clinic at the touch of a button. You may access medical attention in 3 simple ways by using your phone or computer.

One, click on the icon on your phone or computer, two, click on the video button on your phone or computer to start a zoom call (video chat) or three, simply call the number listed on your membership I.D. card. Either way you choose, you will be connected to a medical professional instantly.

Save time and money. Our members do not have to wait for a doctor's appointment, they do not have to drive to the doctor, clinic, or hospital before being seen. A slip and fall no longer means going to the emergency room for hours to be diagnosed.

- Need a prescription filled?
- Blood pressure monitored?
- Or need to discuss some aches and pains?

With our new MD concierge services our members are only one click away from receiving home health care or medical attention!

American Home Care has created a more affordable and efficient way for our members to receive care!

To become a member, simply talk to one of our member representatives. They will help you fill out the short enrollment form, so you may start your membership today.

**Enroll today** and live your life worry free, stress free and with peace of mind knowing your independence, dignity and freedom of choice is protected.
